

APPLICATION SECURITY

WEB & MOBILE SERVICES

METHODICAL, COMPREHENSIVE, RIGOROUS.

Web and mobile applications are here to stay. Regardless if they are core business applications or simply help with operational efficiency, these applications present opportunities for cyber criminals. They effectively could be gateways to your company's sensitive data, intellectual property assets and network infrastructure.

Securing web applications and mobile apps isn't just good practice. In many cases, it has the added benefit of keeping up with compliance.

A commitment to application security is a commitment to data privacy and security. Avertium's application security service offering can help. Using a combination of automation tools, utilities and hands-on testing techniques, Avertium experts perform web applications and mobile app security assessments with more rigor.

THE AVERTIUM ADVANTAGE

- » Passionate, highly certified customer-focused security analysts
- » Benefits inherent in leveraging an experienced penetration testing team
- » Access to a single provider of the full suite of information security and compliance services including:
 - Compliance (HIPAA, PCI, NIST, CCPA, etc.)
 - Managed security services
 - Digital and mobile forensics

“ IT'S THAT CUSTOMER FOCUS THAT HAS APPEALED TO ME. YOU DON'T WANT TO BE JUST ANOTHER NUMBER OR JUST ANOTHER CUSTOMER. I FEEL LIKE [AVERTIUM PUTS] A MORE PERSONAL TOUCH ON IT. ”

- Avertium Customer

SERVICE HIGHLIGHTS

Expertise

Penetration tests (white box testing and black box testing) performed by certified experts included in every assessment

Custom Remediation Plan

A customized remediation roadmap is a standard deliverable

WEB APPLICATION SECURITY

- » Evaluate vulnerabilities in the application development, configuration, deployment and upgrade process as well as maintenance and third-party add-ons
- » Covers the entire exposed web app environment, from the host server to back-end APIs
- » Certified GIAC web application penetration testers (GWAPT)
- » OWASP Top 10

MOBILE APPLICATION SECURITY

- » Detailed security analysis of your Android or iOS phone- or tablet-based app
- » Covers complete mobile app environment, from app on the device to back-end APIs and servers that facilitate the app and store related data
- » Certified GIAC Mobile Device Security Analysts (GMOB)
- » OWASP Mobile Top 10

TACTICAL REMEDIATION REPORTS WITH BOARD-LEVEL VALUE

Avertium customers derive as much value in the deliverables from the assessment as they do the assessment process. Through use of a proprietary platform, we generate a comprehensive report outlining vulnerabilities, risks and business impact along with a detailed technical remediation roadmap prioritized against enterprise-specific risk thresholds.

ABOUT AVERTIUM

Avertium, one of the largest cybersecurity services providers to the mid-to-enterprise market, is redefining the landscape with its distinctive show-no-weakness approach. Forged out of three award-winning cybersecurity services companies, each with a unique perspective on the security landscape, Avertium brings enterprise-level security to the many mid-sized and larger organizations that don't have access to comprehensive, specialized protection. More than 1,200 organizations in industries ranging from financial services and manufacturing, to technology and healthcare benefit from Avertium's managed security, consulting and compliance services delivered with more rigor, more relevance, and more responsiveness. The company's dual security operations centers are located in Arizona and Tennessee. Avertium. Show No Weakness.™
